SUPPLEMENT TO
REPORT NO.

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U. S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

There have been no discernible changes in the disposition and strength of the Soviet ground forces in the Soviet-occupied countries of Europe in February 1952. The units which were affected by a series of reassignments of posts in and after November 1951 were confirmed at their new posts. There are indications that the training activities have been shifted increasingly from the military posts to troop training grounds and other training areas since the middle of February 1952.

GREEN MOUNTAIN

Order of Battle.

1. Reports received between 1 February and 1 March 1952 indicated no changes in the general disposition of the Soviet ground forces in Germany up to mid-February 1952.
2. The following units in the Soviet Zone of Germany, with their APNs, location and date of observation, were confirmed or newly identified between 1 February and 1 March 1952.
 - a. GHQ Units of the Group of Occupation Forces Germany (GOFG)

56th Motor Trans Regt	WURNSDORF	14 February
36th Pon Bridge Regt	MAGDEBURG	24 December
10th (?) Gun Arty Brig	RATHENOW	27 December

Reassignments of Posts.

3. Following the reshuffling of units in the area of the XXVIII Gds Mtr Rifle Corps, the majority of the corps headquarters units and components of the 39th Gds Mtr Rifle Div were confirmed [redacted] at their new posts. * On the other hand, previous indications that the 65th Gds Mecz Regt of the 20th Gds Mecz Div may have been transferred from WEIMAR-NOHRA to GERA have not been substantiated to date. It appears that the unit actually transferred from WEIMAR-NOHRA to GERA is a training unit of the 20th Gds Mecz Div or an artillery school of the Eighth Gds Army.

25X1

Training.

- 4.a. The training of the troops since the middle of January 1952 has been characterized by particularly intensive individual training with continual training from the early morning until late at night, including exercises before dawn in floodlit barracks yards and physical toughening by forced marches with full equipment. Close combat training was observed with units of all branches of service, including AAA units. The conspicuous intensity of individual training appears to have been the result of an order from a central command in an effort to restore to the previous level the combat readiness of the units which had absorbed particularly large contingents of replacements late in 1951. Coinciding with the program of individual training, field exercises at company level were held in the neighborhood of the military posts and, as in January, small units with tanks and artillery pieces were rotated to the troop training grounds, probably for the training of recruits in the firing of individual weapons. This training phase probably ended in the middle of February and was climaxed by inspections of recruits which were reported in Thuringia as late as the last week of February.

SECRET

SECRET

6

25X1

- b. Units, mostly battalions, from various military posts in the Soviet Zone of Germany started rotating to troop training grounds for eight-day training cycles in mid-February. The exercises seemed to have been for firing practice. The following movements under this rotation program were reported:

Eighth Gds Army: 57th Gds Mtz Rifle Div and 21st Gds Mech Div from NAUMBURG, WEISSENFELS and HALLÉ to OHRDRUF. Components of the army or corps artillery brigade from ALTENBURG, possibly to OHRDRUF.

Second Gds Mech Army: 9th Gds Tank Div from NEUSTEDLITZ and PASEWALK, 12th Gds Tank Div from Neuruppin, 1st Mech Div from DOEBERITZ and the unidentified AT artillery brigade from GRANIENBURG, to JUELZBOG.

Third Gds Mech Army: 9th Mech Div from COTTBUS and LUEBBEN to WISS-WASSER.

Fourth Gds Mech Army: 6th Gds Mech Div from FUEBOWALDE to TREPLIN.

- c. Coinciding with these firing practices, the following field exercises involving sizable units were observed in areas other than troop training grounds:

17 to 25 February. Detachments of all components of the Third Shock Army in the NEUBRANDENBURG-GRUENFELD area, probably for a command post exercise.

On and after 18 February. Components of the Eighth Gds Mech Div between GRUENFELD and COTTBUS, probably for a command post exercise.

18 to 22 February. The majority of the components of the 6th Gds Tank Div in the area east of Juelzenburg for an attack exercise involving major artillery units and possibly the use of live ammunition. The exercises terminated at the JUELZBOG troop training grounds.

20 to 25 February. Retraining of unidentified troops in the WITTENBERG area.

29 February. The Hq 57th Gds Mtz Rifle Div left the Hindenburg Kaserne, NAUMBURG, with full field equipment toward WEISSENFELS, possibly for a command post exercise.

Engineer Training.

- d. On 26 February, engineer components of the Second and Fourth Gds Mech Armies started moving to the Rhin-Luch, south of ALTRUPPIN, where they had practiced in previous years.

First Movements of AAA Units.

- e. The two AAA regiments of the unidentified AAA division of the Fourth Gds Mech Army from FUEBOWALDE left their post on 27 February and a light AAA regiment of the 2d Gds AAA Div of the GOFU departed from POTSDAM on 28 February. Their destination could not be determined, but the fact that they took along billeting equipment indicated that they left for a prolonged period of field training. Several batteries of the 250th (?) Gds AAA Regt of the 21st Gds Mech Div from Halle left their post by road for an undetermined destination on 27 February. They, too, appeared to stay away from the post for a long time.

On the whole, the information on the training activities of Soviet units in the Soviet Zone of Germany has been greatly intensified but apparently the individual phases of training have not been shortened.

SECRET

SECRET,

25X1

Personnel.

5. Eight Soviet documents received to date confirmed that the personnel of the 1928 class were discharged at the end of 1951.

Transportation Situation.

6. The daily backlog of freight cars in the Soviet Zone awaiting dispatch decreased from 1,400 to approximately 1,000 units during February.
7. Total coal stocks decreased from 267,000 tons on 13 January to 222,168 tons on 17 February 1952, a quantity adequate for 10 days. On the other hand, the proportion of hard coal reached an all-time high of more than 50 percent of the total coal stocks.
8. Traffic through border crossing points along the Oder-Neisse line was normal. Grain shuttle trains, which started operating on 9 January 1952, continued to be routed through FRANKFURT/Oder and GUBEN. No grain shuttle trains have been observed passing through KUESTRIN-KLETZ to date. Crude oil shipments from ZISMERSDORF, Austria, passing through BAD SCHANDAU decreased further and dropped to a daily average of 62.6 cars as contrasted with 70 observed in mid-January 1952.
9. The most important achievement of the Soviet Zone railroad reconstruction program was the completion, on 4 February 1952, of the second track of the FRANKFURT/Oder-GUBEN railroad line. The single track railroad bridge over the Oder-Spree Canal south of FUERSTENBERG constitutes a bottleneck on this route. Work on the reconstruction of a second track on the bridges over the Oder River in FRANKFURT/Oder and KUESTRIN continued. The construction of a 50-km rail link between EBERSWALDE and LOEWENBERG was started as a priority project. The line will be a new east-west route by-passing BERLIN to the north.
10. The number of locomotives decreased by 124 units.
11. On 13 February 1952, there were 2,513 railroad tank cars available in the Soviet Zone.

Supply Situation.

12. The movement of Soviet supplies by rail in January 1952 was lighter than in December 1951. The westward flow of supplies from the U.S.S.R. sharply decreased in January 1952, and amounted to only 829 boxcar loads as contrasted with 1,755 boxcar loads in December 1951. The greatest reduction in the volume of incoming supplies was in the shipment of ammunition; only 322 boxcar loads arrived in January 1952 as contrasted with 1,266 boxcarloads in December 1951. It can therefore be concluded that the ammunition depots have again been stocked to capacity. Another shipment of eight new tanks arrived at the beginning of February for immediate issuance to troop units. Thus, between late December 1951 and the beginning of February 1952, 65 new T-34 and JS-3 tanks arrived and were issued directly to troop units. Military supply operations within the Soviet Zone of Germany in January 1952 allegedly amounted to only 80 or 90 percent of the December 1951 volume.

TOP SECRET/CONTROL/US OFFICIALS ONLY

8

25X1

German Volkspolizei.13. HVA Police.

The reorganization of the VP Dienststellen (VPDs) began on 10 January 1952. The 2d and 3d Sonderabteilungen were integrated into the infantry Kommandos and the 6th Sonderabteilung was integrated into the artillery Kommando. It has not been determined whether the 4th Sonderabteilung was integrated into the infantry Kommandos and the 5th Sonderabteilung into the artillery Kommando. The 1st and 7th Sonderabteilungen remained independent. Hence it appears that to date the reorganization has resulted only in a change of the organizational structure of the VPDs. This is believed to be the first step toward more comprehensive measures, such as the reorganization of several VPDs into divisions, which may be effected at a political advantageous moment. At present, the reorganization of the HVA units has created the organizational and technical prerequisites for the training of tactical units at the level of a reinforced regiment or of a brigade.

14. Grenzpolizei.

Beginning on 1 January 1952, the numerical strength of the Grenzpolizei was increased and its structure below the level of Grenzkommandanturen was changed. An average Grenzkommandantur previously consisted of four Grenzkommandos, each with an authorized strength of 42 police who performed the actual border guard duty. A Grenzkommandantur now has only three Grenzkommando headquarters, each staffed by eight police. Each Grenzkommando headquarters had two Grenzwachen with an authorized strength of 33 police. The authorized strength of a Grenzpolizei Bereitschaft is therefore increased 17 percent or from 620 to about 960 police. However, in general, the Grenzpolizei components are still below their authorized strengths. The increase in the numerical strength of the Grenzpolizei was effected by the reassignment of personnel from the regular Volkspolizei and the para-military HVA police. Several reports mentioned that HVA personnel who completed their terms of service were transferred to the Grenzpolizei. HVA officers have been placed in charge of most of the newly activated Grenzwachen, probably in an effort to increase the quality of infantry training among the personnel of the Grenzpolizei. It has been determined that certain policies have been established between specific VPDs and Grenzpolizei Bereitschaften regarding the assignment of personnel. In effect, the Grenzpolizei has now become a reserve manpower pool for the para-military Volkspolizei.

AUSTRIA-HUNGARY

15. No change in the disposition of the Soviet ground forces in Austria or Hungary has been observed during February.
16. Components of the 13th Gds Mecz Div confirmed by an evaluation of Soviet documents include: the 44th Gds Mecz Regt in VIENNA up to 4 November 1951; the 45th Gds Mecz Regt in TRAISKIRCHEN up to 15 January 1952; the 128th Tank Bn of the 45th Gds Mecz Regt in TRAISKIRCHEN up to 15 January 1952; the 128th Tank Bn of the 45th Gds Mecz Regt in TRAISKIRCHEN up to 3 January 1952; and the 104th Gds Hv Tank SP Regt in KAGRAN up to 24 September 1951.
17. It appears that, in general, the units continued training at their winter camps during February.
